Work Experience

Freelance Web developer | Tailor's Portfolio

August 2024

Description: Created a custom website for a tailor to showcase their work. Integrated image upload functionality using GridFS and MongoDB to display new designs and client reviews dynamically.

Technologies used: NextJs, Tailwind CSS, MongoDB, GridFS, PrismaORM

Result: Enabled the client to attract more customers by showcasing work visually with a sleek, mobile friendly interface.

Freelance Web developer | AGC Website

July 2024

Description: Developed a fully responsive website for an electrical and construction company, ensuring it displayed well across mobile and desktop devices. Implemented features to enhance user experience and integrated basic SEO strategies. Integrated dynamic content upload utilizing MongoDB, prismaORM and GridFS for media file upload.

Technologies used: NextJs, Tailwind CSS, MongoDB, PrismaORM, GridFS

Result: Improved business outreach and helped the company attract new clients through professional, easy-to-navigate online platform.

Projects

NUESA course resource platform

Description: Built a platform to help students upload and download course materials, such as lecture notes and past questions.

Technologies used: NextJs, MongoDB, GridFS, PrismaORM

Result: Simplified access to academic resources, enhancing the educational experience for university students

MuFcBlog

Description: A blog platform for a football fan group, featuring a GridFS image upload system, MongoDB as the primary database, with authentication and authorization using AuthJs

Technologies used: NextJs, MongoDB, GridFS, PrismaORM, AuthJS

Result: Created an engaging platform for fans to share articles and club updates, helping the community stay connected.
